# ensoBox™ Services Node

The Services Node, powered by patent-pending enso Clustered Services Architecture™, provides a business-grade environment for service delivery at a remarkably reduced cost.

Applications are distributed—using load-balancing technology on multiple redundant servers—to ensure maximum performance, reliability, and efficiency.

The Services Node upgrades easily to handle additional capacity or new services by simply adding a new Services Node.

## Features

enso Clustered Services Architecture™ †

ensoport.com Portal

- Local Content
- Single Gateway To All User Services
- User Customizable

Web-Based Email

- IMAP/POP3 Compliant
- SMTP/ESMTP Compliant
- User Customizable

Components

- ← **Cooling Fan**  
630 Cubic Feet Per Minute Displacement
- ← **Network Switch**  
100Mb Ethernet Switch w/ 24 10/100BaseT Ports
- ← **Content Services Switch**  
Eight 10/100BaseT Ports, 128MB RAM, 2GB HD
- ← **Terminal Server**  
8 x Serial RJ-45 Ports, 10Mbps LAN Interface, w/SNMP
- ← **Application Servers**  
6 x ensoRAIS™ ServiceFEP Servers  
440MHz Ultra Sparc®, 2MB Cache, 512MB High-speed RAM, 100BaseT NIC, 2 x 9GB Ultra Wide SCSI HD, Replaceable Air Filter
- ← **Network Attached Storage**  
512GB Disk Drives, 10/100BaseT NIC, Dual Power Supplies
- ← **Power Subsystem**  
3000VA - 5000VA International Uninterruptible Power Supply, Hot Swap Batteries, Intelligent Battery Management, Overload Indicator, Automatic Voltage Regulation, Software, Rack Mount, Extendable Run Time, Management NIC
- ← **Cabinet**  
19" x 31" x 84" Steel Cabinet, 2 x Power Strips w/11 Outlets each, 1,200lb (545Kg) Load Capacity, 4 x Leg Levelers, 4 x Casters
